Google has been scanning books from public libraries and other sources for several years. That means you've got access to an entire library of classic literature that you can read on the computer or on a variety of mobile devices and eBook readers.

Bsa Sloper Engine

The BSA S-Series of motorcycles, most commonly known as the BSA Sloper, were a series of motorcycles produced by the Birmingham Small Arms Company (BSA) from 1927-1935. Launched in 1927, the 493cc overhead valve engine was slanted, and the motorcycle featured a saddle tank that enabled a low seating position, improving the centre of gravity and handling.

BSA Sloper - Wikipedia

The Sloper was introduced as a top-of-the-range OHV sports machine but, for the 1929 season, BSA added a side-valve version to the range, the Model S Deluxe. While the sporting role of the OHV model was clear, the side-valve Sloper's place in the range was less well-defined.

BSA's Revolutionary 'Sloper' - The Sloper - a 1929 BSA ...

The Sloper's side-valve engine is a traditional British design of the period, with the crank supported in substantial roller and ball races, geared timing drive and oil carried in integral compartments in the front and rear of the crankcase.

Free BSA Motorcycle Service Manuals for download. Lots of people charge for motorcycle service and workshop manuals online which is a bit cheeky I reckon as they are freely available all over the internet. £5 each online or download your BSA manual here for free!!

Free BSA Motorcycle Service Manuals for download

The B series fly wheels will be too light for any 500 cc sloper. At best the primary side engine shaft from a B series probably could be used in the sloper as there only seems to be 2 different diameters used on the engine shafts on singles. A thin one for the light weights and a thicker one for the rest.
