Structuralism is a development theory which focuses on structural aspects which impede the economic growth of developing countries. The unit of analysis is the transformation of a country's economy from, mainly, a subsistence agriculture to a modern, urbanized manufacturing and service economy. Policy prescriptions resulting from structuralist thinking include major government intervention in ...

## **Development theory - Wikipedia**

Ricardo's contribution to economic analysis and theory of economic development is regarded as outstanding and his view is widely shared by other classical economists. As in the case of other classical economists, his analysis of the economy relates to a long period of time as distinguished from a short period analysis.

## **Ricardo's Theory of Economic Development | Economics**

The theory of economic development—how primitive and poor economies can evolve into sophisticated and relatively prosperous ones—is of critical importance to underdeveloped countries, and it is usually in this context that the issues of economic development are discussed. Economic development first became a major concern after World War II.

## **Economic development | Britannica**

Development economics is a branch of economics which deals with economic aspects of the development process in low income countries. Its focus is not only on methods of promoting economic development, economic growth and structural change but also on improving the potential for the mass of the population, for example, through health, education and workplace conditions, whether through public ...

## **Development economics - Wikipedia**

Theories of economic development are made in an attempt to explain how a country's or region's economy forms and thrives, and these theories are often used to make laws and policies. Social theories of economic development focus on social issues to improve the economic status of an area.
